

I.V. Stabilizer™

Stabilizer for infusion

Designed for the prevention of intravenous catheter occlusion

The IV Stabilizer™ is the most convenient and cheapest way to guarantee an uninterrupted flow of fluids. It completes protection of the intravenous catheter and stabilization of the leg.

Take advantage of IV Stab!

- Can be applied by just one person in less than 30 seconds
- Can be removed in less than 10 seconds
- No need of bandages
- No risk of an injury for the patient during the infusion
- The catheter is anytime accessible
- Light weight
- Soft sponge interior for high wear comfort
- Radiotranslucent
- Less stress for the patient

The IV Stabilizer™ is made of durable polypropylene. It can be used over and over again.

This multipurpose tool can be administered to patients with burns, lacerations, abrasions, lick granulomas, elbow calluses, and is a great asset in post orthopedic surgery because it is completely radiolucent.

Available in 4 sizes:

- XS or blue (puppies, little dogs and little cats)
- S or white (cats and little dogs)
- M or green (medium-size dogs)
- L or red (big dogs)

22 rue Charles de Gaulle
22100 Lanvallay - France
